Jailbreaking Guide Using palera1n

Compatibility:

1. Applicable to A8–A11 devices (iPhone X or earlier).
2. Jailbreak also possible via Linux or bootable live environment on Windows
3. Not compatible with VirtualBox, VMware, or any VM lacking PCI passthrough

Requirements:

1. MacBook (any OS version)
2. USB-A to Lightning cable
3. iPhone with 32GB+ storage preferred
4. 10–15GB free space required for semi-tethered jailbreak (Rootful method)
5. Disable passcode/security features on A11 devices before jailbreaking

Troubleshooting:

1. USB-C to Lightning cables may cause DFU mode issues
2. If problems occur, use USB-A to Lightning.

Steps (MacBook):

1. Open Terminal and install Homebrew: /bin/bash -c "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)"
2. Install dependencies: brew install libimobiledevice, libirecovery
3. Navigate to the palera1n download directory
4. Run: sudo mkdir /usr/local/bin (Ignore “File exists” message if shown)
5. Move binary: sudo mv ./palera1n-macos-universal /usr/local/bin/palera1n (optional)
6. Clear extended attributes: sudo xattr -cr /usr/local/bin/palera1n (optional)
7. Make executable: sudo chmod +x /usr/local/bin/palera1n (optional)
8. Run palera1n with appropriate options (device must be connected):
    1. For iOS 16 or 10–15GB free space: palera1n -c -f
    2. For 16GB devices with 2–3GB free: palera1n -c -f
    3. For iOS 15 with 2–10GB free: palera1n -B -f
9. Enter DFU mode and follow onscreen instructions (e.g., Volume Down + Power for 5s, release Power, hold Volume Down for 10s)
10. After booting: palera1n -f
11. Device reboots and installs palera1n app
12. Open palera1n and Install Sileo

Post Jailbreak Instructions

1. If the device reboots, to jailbreak again re-run: palera1n -f
2. On **A11 devices**, do **not** enable passcode or other security features, as this will cause the device to reboot.
3. To remove jailbreak, run: palera1n –force-revert
4. Disable automatic updates:
    - Go to **Settings → General → Software Update**
